

Board Meeting
February 10-11, 2003

Attachment 2b

STATE OF CALIFORNIA

CALIFORNIA INTEGRATED WASTE MANAGEMENT BOARD

Base Year Modification Request Certification

Part 1: Generation Study - No Extrapolation Diversion Data

To request a substitution for a previously approved base year used in calculating the diversion rate for your jurisdiction, please complete and sign this form and return it to your Office of Local Assistance (OLA) representative at the address below, along with any additional information requested by OLA staff. When all documentation has been received, your OLA representative will work with you to prepare for your appearance before the Board. If you have any questions about this process, please call (916) 341-6199 to be connected to your OLA representative.

Mail completed documents to:

California Integrated Waste Management Board
Office of Local Assistance
1001 I Street, (MS-25)
PO Box 4025
Sacramento, CA 95812-4025

General Instructions:

Please select the ONE choice below that best explains your request to the Board.

- ☐ 1. Use a recent generation-based study to calculate our current reporting year generation amount, but not officially change our existing Board-approved base year.
- ☒ 2. Use a recent generation-based study to officially change our existing Board-approved base year to a new base year.

The shaded cells on these sheets are protected. If you have problems using these sheets, please contact your Office of Local Assistance representative by calling (916) 341-6199.

Section I: Jurisdiction Information and Certification

All respondents must complete this section.

I certify under penalty of perjury that the information in this document is true and correct to the best of my knowledge, and that I am authorized to make this certification on behalf of:

Jurisdiction Name		County	
City of Santa Clara		Santa Clara	
Authorized Signature		Title	
		Director of Streets & Automotive Services	
Type/Print Name of Person Signing		Date	Phone () Include Area Code
Richard J. Mauck		01/21/03	(408) 615-2099
Person Completing This Form (please print or type)		Title	
David Staub		Solid Waste Superintendent	
Affiliation:	City of Santa Clara		
Mailing Address	City	State	ZIP Code
1700 Walsh Avenue	Santa Clara	CA	95050
E-Mail Address DStaub@ci.santa-clara.ca.us

Fax #	916 319 7366	Fax #	(408) 988-0237		

Section II: Information for New Generation-Based Study for Existing or New Base Year

Attach additional sheets if necessary—reference each response to the appropriate cell number (e.g., "4").

Note: New base years must be representative of a jurisdiction's disposal and diversion.

1. Current Board-approved existing base year:	2. Proposed new generation-based study year:
1990	1999
3. Explain how the proposed generation study year is representative of average annual jurisdiction disposal and diversion:	
The City has undertaken the preparation of a new waste generation study in order to more fully and accurately access the City's diversion rate. 1999 is the most recent year in which both disposal and diversion data was available.	

4. Enter diversion rate information below.			
Diversion rate calculated using existing base year	a. 38 %	Diversion rate calculated using new generation-based study	b. 45 %
For existing base year pounds/person/day based on generation	16.9	For new generation based study pounds/person/day based on generation	19
Residential generation 22.7 %	Non-Residential generation 77.3 %	Residential generation 11% %	Non-Residential generation 89% %
Population existing generation-based study 102,300		Population new generation-based study 102,300	
5. If there is an increase from 4a to 4b, please explain how the new diversion rate is consistent with your current diversion implementation efforts. If the proposed new generation tonnage results in an increase in your pounds/person/day, please explain how this is consistent with your current diversion implementation efforts and provide any examples (e.g., change in jurisdiction's demographics).			
According to the its most recent PARIS report, the City as implemented 30 diversion programs since 1990. These efforts, and those of the private sector, are not appropriately reflected in the City's current diversion rate. The 1999 Waste Generation Study identified previously undocumented diversion through site visits and surveys of the City's commercial businesses and surveys of materials handlers and solid waste facilities. The increase in the pounds per person per day is a result of the increase in the diversion activities since 1990.			
6. If the difference between the proposed diversion rates in 4a and 4b is greater than 5 percentage points, please explain the specific reasons for the difference. (For example: new/improved curbside diversion programs.)			
The City has implemented a significant number of diversion programs since 1990 and the 1999 Waste Generation Study has identified previously undocumented diversion by the City's private sector.			

7. Disposal Tonnage (enter values):	16924	179060	195984
	Residential	Non-Residential	Total

Please select the **ONE** choice below that best explains your **disposal** data and complete the required tables.

☐ a. All tons claimed are from the Board's Disposal Reporting System (No explanation required. Go to Section 8.)

☐ b. All tons claimed are from a 100 percent audit of hauler and self-haul tonnage. (Please complete Reporting Year Tonnage Request and Modification Certification sheet found at www.ciwm.ca.gov/LGCentral/Forms/rytnmdrq.doc)

☐ c. Some Disposal Reporting System data were corrected. (Please complete Reporting Year Tonnage Modification Request and Certification sheet found at www.ciwm.ca.gov/LGCentral/Forms/rytnmdrq.doc)

8. In the table below, list the summarized diversion activities, and diversion data records that support your claim and are available for Board audit. **Note: The Board expects the jurisdictions to be able to provide all back-up documentation, if requested.** Include type of record and location—for example, weight tickets from transfer stations. This section should capture all diversion tonnage (form will perform all addition calculations). If any diversion is from restricted wastes, agricultural wastes, inert solids [e.g., concrete, asphalt, dirt,] white goods, and scrap metal, please identify those programs/waste types and fill out Section 10. Please mark as Attachment 8 all copies of survey forms.

*Please provide detailed Non-Residential waste information in Section 9.

Note: The Board has indicated that it will be scrutinizing total source reduction amounts greater than 5% of total generation. Please be prepared to provide additional details substantiating your claim.

Diversion Activity	Actual tons	Relative Percent to Total Generation	Specific Material Type(s) (List operation with multiple materials in one box)	Specific Conversion Factor Used (if any) and Source	Type of Record and Location of Record

9. Specific Non-Residential Sector Waste Audits--Top 10 Non-Residential Generators

Please complete this table for the top 10 non-residential generators that were surveyed. List each non-residential generator separately from largest to smallest, based on total diversion tons. Audit reference number ties to your audit sheets.

(Table will perform all addition calculations).

Type of Non-Residential Generator	Audit Reference Number	Specific/Major Diversion Activities Include Material Type (e.g., paper recycling, grasscycling). (List activities on one line)	Source Reduction Tons	Recycling Tons	Composting Tons	Total Diversion Tons	Percent of Total Generation (Total Diversion Tons/Total Generation In Section 8)	Survey Method Phone (P) Mail (M) On-site (O) Other
Paper Manufacturer	JHSV06	paper recycling, paper source reduction	230	15438		15668.52	4.4%	O
Paper Manufacturer	JHSV03	paper recycling, paper source reduction	4805	600		5404.8	1.5%	O
Hi-Tech Manufacturer	HMSV02	OCC, wood and paper recycling, tyvek source reduction	606	4424		5030.51	1.4%	O
Electronics Manufacturer	JHSV01	paper, plastics and post-1990 metals recycling	197	2139		2335.53916	0.7%	O
Grocery	JHPS14	Produce waste composting, cardboard recycling	48	199	683	929.74448	0.3%	P
Wholesale	JSPS04	Cardboard and tire recycling	4	776		780.3	0.2%	P
Food Processing	LPPS02	wood source reduction, OCC recycling	723	15		738.375	0.2%	P
Hi-Tech	HMSV05	OCC and paper recycling		670		670	0.2%	O
Grocery	JHPS22	OCC recycling	48	455		502.84	0.1%	P
Paper Manufacturer	LPPS01	OCC recycling		495		495.04	0.1%	P
Totals			6661.7532	25211.0879	682.6276	32555.66864	9.1%	

Also provide an attachment 9 which includes all of the generators surveyed. Include for each generator (use type of generator in lieu of specific business name) diversion activity and material type and associated tonnage for each diversion activity/material type, and applicable conversion factors/sources. Include copies of survey form(s) used.

The numbers below in parentheses correspond to the top ten generators above - numbered in order (1) through (10).
PAPER: (1) 6,825.0 TPY rough-trim paper recycling, 2,730 TPY final-trim paper recycling, 5,460 TPY box cut-out trim paper recycling, 364 TPY mixed paper scrap recycling, 218.4 TPY fiber roll-core reuse, and 43.68 TPY fiber roll-sleeve recycling (based on estimates provided by business rep). (2) 4,804.8 TPY source reduction through paper reduction, based on 13.2 tons per day, 600 TPY rejected paper scrap recycling, based on 50 tons/mo (based on estimates provided by business rep). (3) 215.35 TPY shredded paper recycling through Emerald Services (based on documented weight provided by business), (4) 8.28 TPY fiber end caps recycling, 49.19 fiber slip sheet recycling, 110.48 white paper recycling, 1.19 computer paper recycling, and 6.68 TPY mixed paper recycling by Smurfit (based on documented weight provided by business). (5) 0.18 TPY paper source reduction through double-sided copying, based on 6 reams/mo @ 5 lb ea. (8) 126.8 TPY mixed paper recycling and 65.4 TPY white paper recycling by Weyerhaeuser (based on actual weight provided by business).
WOOD: (1) 8.57TPY wood source reduction through in-house reuse (based on estimated weight provided by business rep). (3) 3,770.76 TPY wood recycling by Emerald Services (based on actual weight provided by business). (7) 350 TPY plywood bin source reduction, based on 7,000 bins in system @100 lb ea, and 75 TPY plywood bin source reduction through donation of 125 bins each year @100 lb each to Goodwill (based on estimates provided by business rep).
CARDBOARD: (3) 397.82 TPY recycled by Recycled Fibers, Weyerhaeuser, and Cal Paper (based on actual weight provided by business). (4) 290.33 TPY recycled by Smurfit (based on actual weights provided by business). (5) 182 TPY backhauled, based on 2 bales/day @ 500 lb/ea. (6) 530.4 TPY backhauled, based on 600 lb bale. (7) 11.25 TPY source reduction through sale of used boxes to independent company for reuse, based on 15 pallets/yr @ 1,500 lb ea (based on estimate provided by business rep) and 268.13 TPY cardboard box source reduction by reuse of boxes for packaging and shipping (based on verbal estimate provided by business rep). (8) 477.8 TPY recycled by Weyerhaeuser (based on actual weight provided by business rep). (9) 455 TPY backhauled, based on 25 bales/week @ 700 lb ea. (10) 495.04 TPY recycled by Smurfit, based on 28 bales/wk @ 680 lb ea (based on verbal estimate provided by business rep).

(10) 477.0 TPY recycled by Weyerhaeuser (based on actual weight provided by business rep). (3) 400 TPY backhauled, based on 20 bales/week @ 100 lb ea. (10) 495.04 TPY recycled by Smurfit, based on 28 bales/wk @ 680 lb ea (based on verbal estimate provided by business rep).

METAL: (1) 3.27 TPY steel drum source reduction, based on 3000 gal bulk tanks that replaced 30 lb drums. (4) 566.31 TPY aluminum recycling, 302.16 TPY circuit board recycling, 223.13 TPY copper clad recycling, 1.56 TPY copper wire recycling, 96.62 TPY tin recycling, 17.19 TPY solder anode recycling, 145.07 TPY solder dross recycling, 39.21 TPY stainless steel recycling, 21.82 TPY steel drum source reduction and 174.72 TPY stainless steel drum source reduction (metal recycling began in 1998 through SIMS, based upon on actual weight provided by business). (7) 15 TPY post-1990 scrap metal strapping recycling by South Bay Metals (based on verbal estimate of actual weight provided by business rep).

PLASTIC / MISC. MATERIALS: (1) 15.6 TPY film plastic recycling (based on actual weight provided by business rep). (3) 1.04 TPY Instapack recycling, 4.13 TPY HDPE recycling, 1.19 TPY Polyethylene recycling, 1.19 Polystyrene recycling, 18.09 TPY Polyurethane recycling (all serviced by Instapack), and 574.56 TPY Tyvek recycling by Mission Linen (based on actual weight provided by business). (4) 5.03 TPY plastic tubes recycling by SIMS, 1.13 TPY lexan recycling, 188.55 TPY Mylar recycling, 76.49 TPY plastic router dust recycling and 10.05 TPY litho film recycling (based on documented weights provided by business). (5) 16.64 TPY plastic film backhauled, based on 72.32 lb/cubic yard. (6) 12 TPY shrink wrap backhauled, based on 4 bales/mo @ 500 lb ea. (7) 19 TPY plastic drum source reduction, based on 2,000 drums donated to Goodwill @ 19 lb ea.

FOOD and ORGANICS: (5) 682.83 TPY produce waste backhauled and recycled, based on 2.6 cubic yards generated per day @ 1,443 lb/cubic yard, 9.10 TPY food source reduction, based on 50 loaves/day donated to Martha's Kitchen @ 1 lb ea. (6) 3.9 TPY food source reduction, based on 2 baskets/day donated to Fishes & Loaves @ 15 lb ea. (9) 16.64 TPY produce source reduction, based on 320 lbs twice per week donated to senior citizens and churches.

TIRES: (6) 234TPY tire backhaul and recycling, based on 450 tires/wk @20 lb ea.

DAMAGED GOODS: (5) 39 TPY damaged goods backhauled, based on 50 boxes/wk @30 lb ea. (9) 31.2 TPY damaged goods backhauled, based on 30 boxes/wk @40lb ea.

FURNITURE: (3) 16TPY furniture source reduction through donation to Burke's (based on actual weight provided by business).

COMPUTER: (3) 13.82 TPY computer equipment source reduction to ARM Redistribution (based on actual weight provided by business). (4) 0.40 TPY computer equipment source reduction, based on 400 lbs donated every 6 months.

GLASS: (3) 13.77 TPY recycling by ABC and SIMS (based on actual weight provided by business).

10. For each restricted waste type (i.e., agricultural waste, inert solids, [e.g. concrete, asphalt, dirt, etc.] scrap metals and white goods [PRC section 41781.2]) and associated program, please provide the following information:

a. If the diversion program started on or after January 1, 1990, complete the following table.

Note: program name refers to one specific diversion program for that waste type (e.g., "Diversion conducted by city public waste dept.").

Restricted Waste Type	Specific Program Name	Year Started	Tonnage
Scrap Metal	Post-1990 Commercial Waste Assessment Metal Recycling	Post-1990	1828
Inert Solids	City Sponsored C&D Recycling (Public Works)	1995	1263
Inert Solids	City Sponsored Scrap Metal and Appliance Recycling (Public Works)		231
Pull Down for Waste Types			
Pull Down for Waste Types			
Pull Down for Waste Types			

b. If the diversion program started before January 1, 1990 - and if documentation on the program and waste type has not been approved by the Board - on a separate sheet marked "Attachment 10b", provide the documentation that indicates:

- How the diversion was the result of a local action taken by the jurisdiction, which specifically resulted in the diversion (PRC sec. 41781.2 [c] [1]).
- That the amount of that waste type diverted from the jurisdiction in 1990 was less than or equal to the amount of that waste type disposed at a permitted disposal facility by the jurisdiction in any year before 1990. (**Note:** this criterion is applicable to the entire jurisdiction, not to individual programs (PRC sec. 41781.2 [c] [2]). Please include documentation.
- That the jurisdiction is implementing, and will continue to implement, the diversion programs in its source reduction and recycling element.

Note: If documentation for a waste type and program has already been approved by the Board, you do not have to provide an attachment 10b for that waste type and program.

Instead please provide date of Board approval of previously submitted information.

(Date)

If documentation is not available, go to 10d.

c. If the diversion program started before January 1, 1990, and the documentation requested in 10b is available (but not yet approved by the Board), complete the table below for each program claimed:

Restricted Waste Type	Specific Program Name	New Base Year or Reporting Year Diversion Tonnage
Pull Down for Waste Types		
Pull Down for Waste Types		
Pull Down for Waste Types		
Pull Down for Waste Types		
Pull Down for Waste Types		
Pull Down for Waste Types		

d. If the diversion program started before January 1, 1990, and the documentation requested in 10b is not available, please complete the table below for each program claimed. **Note:** Only the difference between the new base year/reporting year and 1990 can be counted in the diversion rate calculation.

Restricted Waste Type	Specific Program Name	New Base Year or Reporting Year Tonnage	1990 Diversion Tonnage	Difference
Inert Solids	Landfill C&D diversion (restricted materials)	See attached	See attached	16,809.61

Totals			6259.8882	25384.371	27.38	31671.63916	8.9%	

Also provide an attachment 9 which includes all of the generators surveyed. Include for each generator (use type of generator in lieu of specific business name) diversion activity and material type and associated tonnage for each diversion activity/material type, and applicable conversion factors/sources. Include copies of survey form(s) used.

The numbers below in parentheses correspond to the top ten generators above - numbered in order (1) through (10).
PAPER: (1) 6,825.0 TPY rough-trim paper recycling, 2,730 TPY final-trim paper recycling, 5,460 TPY box cut-out trim paper recycling, 364 TPY mixed paper scrap recycling, 218.4 TPY fiber roll-core reuse, and 43.68 TPY fiber roll-sleeve recycling (based on estimates provided by business rep). (2) 4,804.8 TPY source reduction through paper reduction, based on 13.2 tons per day, 600 TPY rejected paper scrap recycling, based on 50 tons/mo (based on estimates provided by business rep). (3) 215.35 TPY shredded paper recycling through Emerald Services (based on documented weight provided by business), (4) 8.28 TPY fiber end caps recycling, 49.19 fiber slip sheet recycling, 110.48 white paper recycling, 1.19 computer paper recycling, and 6.68 TPY mixed paper recycling by Smurfit (based on documented weight provided by business). (5) 0.18 TPY paper source reduction through double-sided copying, based on 6 reams/mo @ 5 lb ea. (8) 126.8 TPY mixed paper recycling and 65.4 TPY white paper recycling by Weyerhaeuser (based on actual weight provided by business).
WOOD: (1) 8.57TPY wood source reduction through in-house reuse (based on estimated weight provided by business rep). (3) 3,770.76 TPY wood recycling by Emerald Services (based on actual weight provided by business). (7) 350 TPY plywood bin source reduction, based on 7,000 bins in system @100 lb ea, and 75 TPY plywood bin source reduction through donation of 125 bins each year @100 lb each to Goodwill (based on estimates provided by business rep).
CARDBOARD: (3) 397.82 TPY recycled by Recycled Fibers, Weyerhaeuser, and Cal Paper (based on actual weight provided by business). (4) 290.33 TPY recycled by Smurfit (based on actual weights provided by business). (5) 182 TPY backhauled, based on 2 bales/day @ 500 lb/ea. (6) 530.4 TPY backhauled, based on 600 lb bale. (7) 11.25 TPY source reduction through sale of used boxes to independent company for reuse, based on 15 pallets/yr @ 1,500 lb ea (based on estimate provided by business rep) and 268.13 TPY cardboard box source reduction by reuse of boxes for packaging and shipping (based on verbal estimate provided by business rep). (8) 477.8 TPY recycled by Weyerhaeuser (based on actual weight provided by business rep). (9) 455 TPY backhauled, based on 25 bales/week @ 700 lb ea. (10) 495.04 TPY recycled by Smurfit, based on 28 bales/wk @ 680 lb ea (based on verbal estimate provided by business rep).

(6) 477.0 TPY recycled by Weyerhaeuser (based on actual weight provided by business rep). (8) 400 TPY backhauled, based on 20 bales/week @ 200 lb ea. (10) 495.04 TPY recycled by Smurfit, based on 28 bales/wk @ 680 lb ea (based on verbal estimate provided by business rep).

METAL: (1) 3.27 TPY steel drum source reduction, based on 3000 gal bulk tanks that replaced 30 lb drums. (4) 566.31 TPY aluminum recycling, 302.16 TPY circuit board recycling, 223.13 TPY copper clad recycling, 1.56 TPY copper wire recycling, 96.62 TPY tin recycling, 17.19 TPY solder anode recycling, 145.07 TPY solder dross recycling, 39.21 TPY stainless steel recycling, 21.82 TPY steel drum source reduction and 174.72 TPY stainless steel drum source reduction (metal recycling began in 1998 through SIMS, based upon on actual weight provided by business). (7) 15 TPY post-1990 scrap metal strapping recycling by South Bay Metals (based on verbal estimate of actual weight provided by business rep).

PLASTIC / MISC. MATERIALS: (1) 15.6 TPY film plastic recycling (based on actual weight provided by business rep). (3) 1.04 TPY Instapack recycling, 4.13 TPY HDPE recycling, 1.19 TPY Polyethylene recycling, 1.19 Polystyrene recycling, 18.09 TPY Polyurethane recycling (all serviced by Instapack), and 574.56 TPY Tyvek recycling by Mission Linen (based on actual weight provided by business). (4) 5.03 TPY plastic tubes recycling by SIMS, 1.13 TPY lexan recycling, 188.55 TPY Mylar recycling, 76.49 TPY plastic router dust recycling and 10.05 TPY litho film recycling (based on documented weights provided by business). (5) 16.64 TPY plastic film backhauled, based on 72.32 lb/cubic yard. (6) 12 TPY shrink wrap backhauled, based on 4 bales/mo @ 500 lb ea. (7) 19 TPY plastic drum source reduction, based on 2,000 drums donated to Goodwill @ 19 lb ea.

FOOD and ORGANICS: (5) 682.83 TPY produce waste backhauled and recycled, based on 2.6 cubic yards generated per day @1,443 lb/cubic yard, 9.10 TPY food source reduction, based on 50 loaves/day donated to Martha's Kitchen @ 1 lb ea. (6) 3.9 TPY food source reduction, based on 2 baskets/day donated to Fishes & Loaves @ 15 lb ea. (9) 16.64 TPY produce source reduction, based on 320 lbs twice per week donated to senior citizens and churches.

TIRES: (6) 234TPY tire backhaul and recycling, based on 450 tires/wk @20 lb ea.

DAMAGED GOODS: (5) 39 TPY damaged goods backhauled, based on 50 boxes/wk @30 lb ea. (9) 31.2 TPY damaged goods backhauled, based on 30 boxes/wk @40lb ea.

FURNITURE: (3) 16TPY furniture source reduction through donation to Burke's (based on actual weight provided by business).

COMPUTER: (3) 13.82 TPY computer equipment source reduction to ARM Redistribution (based on actual weight provided by business). (4) 0.40 TPY computer equipment source reduction, based on 400 lbs donated every 6 months.

GLASS: (3) 13.77 TPY recycling by ABC and SIMS (based on actual weight provided by business).

10. For each restricted waste type (i.e., agricultural waste, inert solids, [e.g. concrete, asphalt, dirt, etc.] scrap metals and white goods [PRC section 41781.2]) and associated program, please provide the following information:

a. If the diversion program started on or after January 1, 1990, complete the following table.

Note: program name refers to one specific diversion program for that waste type (e.g., "Diversion conducted by city public waste dept."

Restricted Waste Type	Specific Program Name	Year Started	Tonnage
Scrap Metal ▼	Post-1990 Commercial Waste Assessment Metal Recycling	Post 1990	1828
Inert Solids ▼	City Sponsored C&D Recycling (Public Works)	1995	1263
Inert Solids ▼	City Sponsored Scrap Metal and Appliance Recycling (Public Works)	Post 1990	231

Pull Down for Waste Types ▼			
Pull Down for Waste Types ▼			

b. If the diversion program started before January 1, 1990 - and if documentation on the program and waste type has not been approved by the Board - on a separate sheet marked "Attachment 10b", provide the documentation that indicates:

- How the diversion was the result of a local action taken by the jurisdiction, which specifically resulted in the diversion (PRC sec. 41781.2 [c] [1]).
- That the amount of that waste type diverted from the jurisdiction in 1990 was less than or equal to the amount of that waste type disposed at a permitted disposal facility by the jurisdiction in any year before 1990. (**Note:** this criterion is applicable to the entire jurisdiction, not to individual programs (PRC sec. 41781.2 [c] [2]). Please include documentation.
- That the jurisdiction is implementing, and will continue to implement, the diversion programs in its source reduction and recycling element.

Note: If documentation for a waste type and program has already been approved by the Board, you do not have to provide an attachment 10b for that waste type and program.

Instead please provide date of Board approval of previously submitted information.

_____ (Date)

If documentation is not available, go to 10d.

c. If the diversion program started before January 1, 1990, and the documentation requested in 10b is available (but not yet approved by the Board), complete the table below for each program claimed:

Restricted Waste Type	Specific Program Name	New Base Year or Reporting Year Diversion Tonnage

Pull Down for Waste Types ▼		
Pull Down for Waste Types ▼		
Pull Down for Waste Types ▼		

d. If the diversion program started before January 1, 1990, and the documentation requested in 10b is not available, please complete the table below for each program claimed. **Note:** Only the difference between the new base year/reporting year and 1990 can be counted in the diversion rate calculation.

Restricted Waste Type	Specific Program Name	New Base Year or Reporting Year Tonnage	1990 Diversion Tonnage	Difference
Inert Solids ▼	Landfill C&D diversion (restricted materials)	See attached	See attached	16,809.61
